How Can I Best Research North Carolina Marriage Bonds, 1741-1868?

There are many types of marriage records. Some of these include consent affidavits, marriage banns (religious custom), marriage bonds, marriage licenses, and marriage certificates. The information provided in these records will vary according to purpose and the year in which they were created, but almost all of them list the names of the bride and groom and the date and place of the event. Occasionally the names of parents, ages of bride and groom, birthplaces of bride and groom, signature of the issuing clerk, and other details will also be found among marriage records.

Use information found in marriage records to lead you to other records. For instance, if the ages of the groom are listed in the record, you can calculate an approximate date of birth, which will then tell you when to begin looking for birth records of these individuals. Try to match the dates on marriage licenses to newspaper announcements of weddings that can fill in extra details. Also, see if there are city directories, church records, or other records of the individual that you have been able to pinpoint being in a certain place at a certain time.
